

**Remarks** begin on page 6 of this paper.

**Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) A resilient, flexible, non-slip, non-adhesive curl resistant sheet material for covering household surfaces comprising:

a thin, continuous, polyolefin top film, and,

a continuous foam layer of uniform thickness cast on said film, adjacent to said film

5 and adhering to said film, the foam layer defining a bottom surface for contacting said household surface.

2. (Currently Amended) ~~The~~ A resilient, flexible, non-slip, non-adhesive curl resistant sheet material of claim 1 wherein said for covering a household surface comprising:

a thin, continuous, plastic top film is a film impregnated with polycarbonate to provide having skin characteristics on the surface of said film, and,

5 a continuous foam layer of uniform thickness adjacent to said film and adhering to said film, said surface of the impregnated film to which said foam layer adheres, ~~said skin characteristics~~ enhancing adhesion of said foam layer.

3. (Cancelled)

4. (Cancelled)

5. (Previously amended) The sheet material of claim 1 wherein said foam layer contains dienepolymers.

6. (Previously amended) The sheet material of claim 1 wherein said foam layer contains rubbers.

7. (Cancelled)

8. (Previously amended) The sheet material of claim 1 wherein said top film is a polypropylene film.

9. (Previously amended) The sheet material of claim 1 wherein said foam layer is non-reactive and free of plasticizers.

10. (Previously amended) The sheet material of claim 1 wherein said foam layer is styrene butadiene foam.

11. (Original) The sheet material of claim 2 wherein said foam layer is about 30-40 mils thick.

12. (Original) The sheet material of claim 11 wherein said foam layer is a styrene butadiene foam.

13. (Original) The sheet material of claim 12 wherein said foam layer is free of plasticizers.

14. (Currently Amended) ~~The~~ A resilient, flexible, non-adhesive curl resistant sheet material of claim 13 wherein said for covering a household surface comprising:

a thin, continuous, plastic top film is about 3 mils thick, and,

a continuous foam layer of uniform thickness and about 30-40 mils thick adjacent

5 to said film and adhering to said film, the foam layer defining a non-slip bottom surface for contacting said household surface.

15. (Original) The sheet material of claim 1 wherein said top film is coated with a primer and said foam layer adheres to said primer.

16.-31. (Withdrawn)

32. (New) The sheet material of claim 1 wherein said foam layer is about 30-40 mils thick.

33. (New) The sheet material of claim 14 wherein said foam layer is a styrene butadiene foam.

34. (New) The sheet material of claim 14 wherein said foam layer is free of plasticizers.
